VISION STATEMENT

The ***** is dedicated to the ideals of Community Theatre: a system of artistic creation whereby members of the community gather together to create a product to be enjoyed as both a creative process and an artistic product. It is this model, in an environment of professional leadership, and with an emphasis on the educational process, which we seek to perfect.

In order to achieve this, we believe that our theatre must provide high-quality opportunities for exploration of the theatrical art form on both sides of the proscenium. And, as ever higher levels of quality are achieved, we must grow to expand the opportunities even more.

We envision a center for theatrical activity which builds on volunteers' educational experiences to create excellent products for our audiences; where classes, productions and workshops enhance the skills and deepen the appreciation for theatre among volunteers, students and audiences; and where interested participants at various levels of experience can grow to achieve the highest artistic expression of which they are capable. The success of this effort will be seen in a continuing improvement in the quality of product we provide for the entertainment of the larger community.

We also see the ***** as the focal point for theatrical growth in all parts of our community. We will support those who create theatre for ***** and provide leadership in bringing theatre education to our community through our programming as well as through advocacy of city, county, state and regional initiatives.

In these ways, we will continue to be a vital part of our society, an essential artistic partner in our community, and a positive economic force in our neighborhood.
